

Driver Licence Checking

Are your employees licenced to drive?

If you have employees who drive on business at any time in any vehicle you have a duty of care to ensure that they are **licenced to drive**. Considering there is no longer a licence counterpart, our licence checking service offers you a quick and efficient way to manage your drivers.

Days Fleet provides a comprehensive electronic licence checking system which links with the live DVLA system, ensuring that you always have the most up to date and accurate information on everyone driving your vehicles on business or for private use - this can include grey fleet drivers or other authorised drivers.

We'll manage the ongoing process of checking that anyone driving vehicles in connection with your business has the necessary authorisation to meet your duty of care responsibilities. All results will be sent to you via regular management information reports and will also be quickly visible through the traffic light system on our Client Dashboard.

-  Assists in your mandatory Duty of Care requirements
-  Storage of licence data on Client Dashboard for quick and easy retrieval
-  Automated checks on all drivers with higher risk drivers checked more frequently
-  A simple and efficient way for you to manage your licence checking requirements
-  Check your lease vehicle drivers, grey fleet drivers as well as any other authorised drivers
-  Management Information reporting
-  Electronic licence link to DVLA

Days Fleet's electronic licence checking service has considerably reduced our internal administrative burden and improved our duty of care responsibilities.

CLIENT DASHBOARD

Since 1988, we have been providing fleet solutions to organisations in the private and public sector all across the UK and have grown to become one of the country's leading independent vehicle funding, leasing and fleet management companies.

Operating independently, but benefiting from the full ownership and backing of Days Motor Group, we have gained a reputation for quality services and a spirit of partnership with our clients and suppliers. We have the flexibility and the desire to deliver an outstanding service to fleets of all sizes. With no affiliation to a bank or vehicle manufacturer, we are well placed to offer impartial advice and to recommend the optimum fleet solution tailored to you.

We pride ourselves on our consultative approach by offering a flexible, yet comprehensive portfolio of products to suit our client's ever-changing business needs. At the heart of all of our services are our experienced, dedicated team who work to meet all of your fleet requirements.
